

## Djibouti

Djibouti In 1997, FCR and the Djibouti authorities created a PLC named **STID (Société des Télécommunications Internationales de Djibouti)**. **STID** offers value-added services, Internet services, DJIPAC datacom and AMPS mobile telephony. France Telecom also offers X.25 data access point through **STID**. Owing to the **STID's** modern technical means, Djibouti is one of the best-equipped countries in the region.
